Dear Madam:

Foit-Albert Associates, P.C. has been contracted by the Schoharie County Department of Public Works to provide engineering services in planning and designing the replacement of the C.C.C. Camp Road Bridge over the Catskill Creek, Town of Broome, Schoharie County, New York. The engineering services include the preparation of Project Documents in accordance with the New York Department of Transportation, Federal Highway Administration and FEMA requirements, which includes environmental studies for the project location. The project consists of replacing the existing bridge (storm damaged truss) with a new bridge in approximately the same location. The extent of construction is anticipated to be no more than 100 feet upstream and downstream of the existing bridge location. Enclosed please find a U.S.G.S. 7.5 minute quadrangle depicting the project location and an aerial image of the project site representing the approximate project boundary.

We respectfully request, under the Freedom of Information Law, any available information on the hazardous waste conditions or incident reports that may be contained in the United States Environmental Protection Agency (USEPA) Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS). Thank you for your time and effort in responding to our request.

Please feel free to contact me at (518) 452-1037 if you have any questions.

Very Truly Yours,
Foit-Albert Associates, P.C.

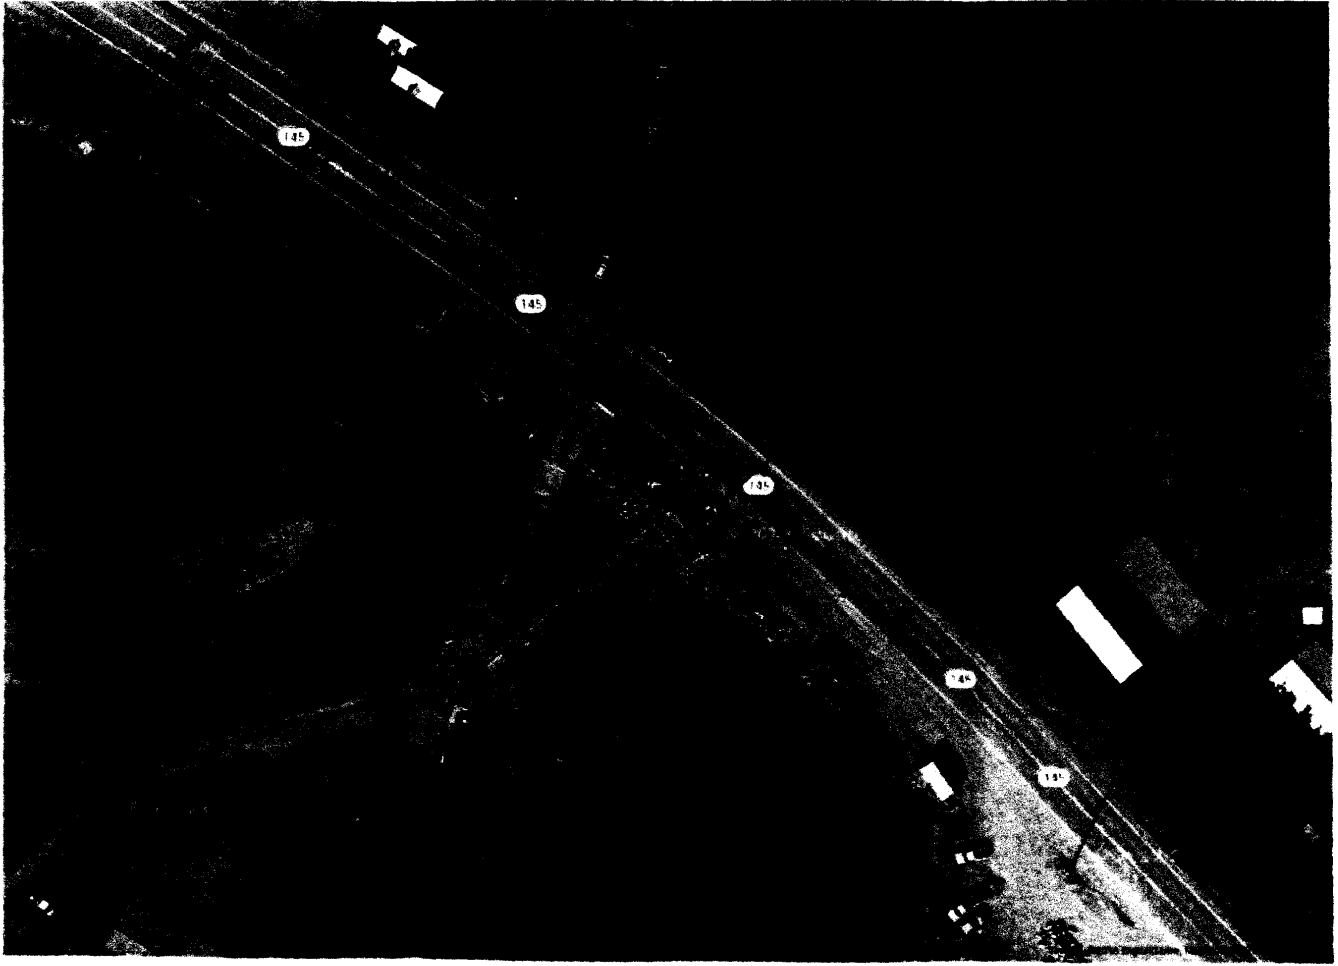

Norman Pirro P.E.
Senior Project Engineer
